Impact on P-12 Learning & Development and Teaching Effectiveness

Much of the data addressing CAEP’s Annual Report Section 4 (‘Display of Annual Reporting Measures’) will come from Georgia’s Preparation Program Effectiveness Measures (PPEM). PPEMs include data that will address Component 4.1 (student growth—for fields in which student growth percentiles are calculated by the state), Component 4.2 (completer effectiveness), Component 4.3 (satisfaction of employers), and Component 4.4 (satisfaction of completers). Although the Georgia Professional Standards Commission and the Georgia Department of Education have collaborated to produce these data for each individual EPP, 2017-2018 is a pilot year for the state to examine the data. They will not be available for public display until September 2018.
