The COE Policy on Reliability, Validity, and Fairness in Assessment

The College of Education Unit of Georgia Southern University ensures that its candidate, program, department, and unit assessment systems are reliable, valid, and fair through the implementation of a systematic set of documented procedures that are maintained, shared, and frequently reviewed by the Unit (COE Procedures for Reliability, Validity, and Fairness in Assessment). The Unit recognizes the interrelatedness and reciprocal nature of elements that make up this set of assessment procedures.

The College of Education is committed to the use of multiple forms of assessment within all of its programs and the ongoing study of its performance data and measures for improvement and the establishment of accuracy, consistency, and fairness. Furthermore, the rights of all candidates completing assessments within Unit programs will be protected by measures taken to ensure that each candidate has an equal opportunity to successfully complete each assessment.
